PERSONAL STATEMENT

Software Engineer with experience developing and maintaining internal business applications using PHP, Laravel, JavaScript, C#, React, TypeScript, HTML/CSS, and MySQL. Contributed to the development of web-based systems, administrative dashboards, and desktop applications that improved business processes through automation, data management, and workflow efficiency. Experienced working collaboratively with cross-functional teams to deliver practical software solutions while supporting application maintenance and continuous improvements.

KEY SKILLS AND EXPERIENCE

- Software Development: PHP, Laravel, JavaScript, C#, React, TypeScript, HTML/CSS, MySQL.
- Web Application Development & RESTful API Integration.
- Database Design, SQL Queries & Data Management.
- Software Maintenance, Debugging & Application Troubleshooting.
- Business Process Automation & Internal System Development.
- Google Apps Script & Google Workspace Solutions.
- Version Control (Git/GitHub) & Collaborative Development.
- Cross-functional Team Collaboration & Agile Development Practices.
- Problem Solving, Analytical Thinking & Attention to Detail.

WORK HISTORY

CONCIERGE **May 2025 – Present**
Khidmah – Sole Proprietorship L.L.C Abu Dhabi, UAE

- Managed front desk operations by assisting minimum of 120 visitors, deliveries, contractors, and guests daily, ensuring smooth check-ins, apartment bookings, and service requests while maintaining professional customer experience.
- Maintained 98% accurate visitor, guest, and delivery records in compliance with company policies and data privacy standards, minimizing documentation errors and ensuring efficient tracking.

- Coordinated maintenance requests, resident concerns, and service provider access, monitoring cases through completion to support timely issue resolution and high resident satisfaction.

SOFTWARE ENGINEER **Jan 2023 – Feb 2025**

CCK City Network, Inc. – (Hybrid) Pasig, Philippines

- Collaborated in the development of an internal Inventory Management System using Laravel, PHP, JavaScript, and MySQL, implementing modules for company asset tracking, management, and reporting dashboards.
- Developed an internal administrative dashboard using Google Apps Script and Google Sheets, adding search, filtering, and multilingual features for 500+ student records, reducing manual lookup time by approximately 40%.
- Built a C# (.NET) desktop application with Excel import/export and barcode scanner integration, allowing staff to quickly retrieve student records and update payment statuses while replacing manual lookup processes.

L1 ENTERPRISE SUPPORT ENGINEER **Oct 2021 – Jan 2023**

Converge ICT Solutions, Inc. – (Hybrid) Pasig, Philippines

- Managed 50–100 enterprise support tickets daily, increasing to 150–200 tickets during major outages, while consistently meeting SLA targets and maintaining clear communication with customers and internal stakeholders.
- Performed first-level diagnostics for enterprise connectivity issues using SolarWinds to monitor OLP (Optical Line Profile) status and PuTTY for bandwidth verification, validating service conditions and identifying potential network issues before escalation.
- Acted as the primary liaison between enterprise customers, the Network Operations Center (NOC), and Field Engineers by gathering technical details, documenting incidents, and coordinating resolutions for network faults, including bandwidth discrepancies and LOS (Loss of Signal) cases requiring onsite intervention.

EDUCATION AND QUALIFICATIONS

Bachelor of Science in Information Technology ***Mar 2015 – Mar 2020***

Our Lady of Fatima University Antipolo, Philippines
