WORK & RELEVANT EXPERIENCE

Software Engineer

Pasig, Philippines

CCK City Network, Inc.

Jan 2023 – Feb 2025

- Collaborated with a small development team to complete an internal **Inventory Management System**, taking over responsibilities after the original lead developer resigned.
- Developed a student management system for Manila-Japanese School (MJS), enabling staff to efficiently:
 - Filter and manage student data by course enrollment, academic performance, and payment status.
- Built a desktop application using C# (.NET) with core CRUD functionality, including:
 - File upload, data viewing, updating, searching, and exporting and **barcode scanner integration** to automatically retrieve and display system records, improving data lookup efficiency.

L1 Enterprise Support Engineer

Pasig, Philippines

Converge ICT Solutions, Inc. – (Hybrid)

Oct 2021 – Jan 2023

- Created and responded to 50–100 service requests daily for internet connectivity issues.
- Accurately logged incidents with attached photos of monitoring taken and escalated to proper team via OTRS and Viber if customer issue persists.
- Communicated emergency outages full details to affected clients including actions taken by field engineers and estimated time of restoration.
- Collaborated with field engineers and NOC to restore services, reducing downtime by 25%.
- Assisting clients through the standard documented troubleshooting procedure, improving first-call resolution rates.

Concierge

Abu Dhabi, UAE

Khidmah – Sole Proprietorship L.L.C

May 2025 – Present

- Managed and supported digital visitor management and building systems by registering new and returning visitors, maintaining accurate system records, and enforcing data privacy and information security standards.

- Logged, categorized, and tracked resident-reported issues using structured support records, performed initial triage, escalated incidents to the appropriate teams, and followed up to ensure timely resolution and closure.
- Generated, consolidated, and submitted daily operational and system reports to management covering housekeeping and facilities activities for Reflection Towers A & B, ensuring data accuracy and completeness.
- Conducted verification and access control checks for external real estate agents by validating credentials, confirming unit status via intercom systems, and coordinating with security teams to prevent unauthorized access.

EDUCATION

Bachelor of Science in Information Technology
Our Lady of Fatima University

Antipolo City, Philippines
Mar 2015 – Mar 2020

PROJECTS

HRIS (Human Resources Information System) — *Status: Ongoing*

Tech Stack: Laravel · PHP · JavaScript · Alpine.js · MariaDB
