PROFESSIONAL SUMMARY

Software Engineer experienced in building data-driven applications, including a C# (.NET) barcode-integrated inventory system and a Google Apps Script platform managing 500+ student records with measurable efficiency improvements. Background includes contributing to Laravel/PHP system enhancements within a production environment. Targeting Full-Stack or Front-End roles focused on modern JavaScript, responsive UI development, and scalable backend integration.

WORK EXPERIENCE

Software Engineer

Pasig, Philippines

CCK City Network, Inc.

Jan 2023 – Feb 2025

- Contributed to the end-to-end development of an internal Inventory Management System using Laravel, PHP, JavaScript, MySQL, and Bootstrap, delivering core modules including stock tracking, supplier management, and reporting dashboards.
- Built a student online board for Manila-Japanese School (MJS) using Google Apps Script, enabling administrative staff to filter records for 500+ students across enrollment, academic performance, and payment status, reducing manual data lookup time by an estimated 40%.
- Engineered a C# (.NET) desktop application with full CRUD operations, file management, and barcode scanner integration, enabling staff to retrieve and update inventory records in under 3 seconds; replacing a previously manual lookup process.

L1 Enterprise Support Engineer

Pasig, Philippines

Converge ICT Solutions, Inc. – (Hybrid)

Oct 2021 – Jan 2023

- Partnered with field engineers and the Network Operations Center (NOC) to diagnose and resolve enterprise network outages, reducing average service downtime by 25% across a portfolio of business clients
- Achieved consistent first-call resolution for enterprise connectivity issues by developing and following structured troubleshooting runbooks, eliminating the need for repeat escalations in the majority of cases.

Concierge

Khidmah – Sole Proprietorship L.L.C

Abu Dhabi, UAE

May 2024 – Present

- Administered digital visitor management systems, maintaining accurate records for 100+ daily visitors and enforcing data privacy compliance standards in line with organizational security policies.

PROJECTS

HRIS (Human Resources Information System) — *Status: Ongoing*

Tech Stack: Laravel • PHP • Tailwind CSS • JavaScript • MariaDB

- Co-developing a Human Resources Information System (HRIS) using Laravel, PHP, and MariaDB to manage employee records, attendance tracking, and HR workflows, designed to support organizations with 100+ employees.
- Implemented a reactive front-end with Alpine.js and AJAX to enable real-time data updates without page reloads.
- Collaborating on UI/UX design decisions for remaining modules, iterating on wireframes and component layouts to finalize a consistent design system across the application.

Personal Portfolio — *Status: Ongoing*

Tech Stack: React • TypeScript

- Developed a personal portfolio website using React and TypeScript, showcasing projects and technical skills with a responsive, component-driven UI. Currently enhancing the site with light/dark mode theming and user authentication features.

SKILLS

Languages: PHP • JavaScript • TypeScript • C# • Google Apps Script

Front-end Technology: Tailwind CSS • Bootstrap • HTML5 • CSS3

Frameworks & Libraries: Laravel • React • Node.js

Databases: MySQL • MariaDB

EDUCATION

Bachelor of Science in Information Technology

Our Lady of Fatima University

Antipolo, Philippines

Mar 2015 – Mar 2020
